## Summary

---

Software engineer with 6 years of experience building scalable web applications. Passionate about clean code, developer tooling, and collaborative teams. Comfortable across the full stack with a backend focus.

## Experience

---

### Senior Software Engineer

*Acme Corp – San Francisco, CA | Jan 2023 – Present*

- › Led migration of monolithic Rails app to microservices, reducing p99 latency by 40%
- › Mentored 3 junior engineers through weekly 1:1s and code reviews
- › Designed and shipped a real-time notification system serving 500k daily active users
- › Championed adoption of feature flags, enabling zero-downtime deploys across 12 services

### Software Engineer

*Bright Technologies – Remote | Jun 2020 – Dec 2022*

- › Built REST and GraphQL APIs consumed by iOS, Android, and web clients
- › Reduced CI pipeline runtime from 18 minutes to 6 minutes through parallelization and caching
- › Collaborated with product and design to deliver 4 major feature launches on schedule
- › Maintained 99.95% uptime for payment processing service handling \$2M/month in transactions

### Junior Software Engineer

*Startup Labs – Austin, TX | Aug 2018 – May 2020*

- › Developed customer-facing dashboards using React and TypeScript
- › Wrote unit and integration tests, raising code coverage from 42% to 78%
- › Participated in on-call rotation and resolved production incidents

## Education

---

**B.S. Computer Science** – University of Texas at Austin | 2018

## Skills

---

<b>Languages</b>	Ruby, Python, TypeScript, Go, SQL
<b>Frameworks</b>	Rails, Django, React, Node.js
<b>Infrastructure</b>	AWS (EC2, RDS, S3, Lambda), Docker, Kubernetes, Terraform
<b>Tools</b>	PostgreSQL, Redis, Kafka, Git, Datadog, PagerDuty

## Projects

---

**OpenTrack** – [github.com/alexjohnson/opentrack](https://github.com/alexjohnson/opentrack) Open-source time tracking CLI built in Go. 800+ GitHub stars, 40+ contributors.

**Budget Buddy** – [budgetbuddy.app](https://budgetbuddy.app) Personal finance web app with bank sync, built with Next.js and Plaid API. 2,000 active users.
